Projects

- **Colour Blindness App:**
Built a solo Android application to detect and quantify red/green colour blindness using Ishihara image sets; validated on real users with 90% accuracy but not yet deployed on any store.
- **Plant Disease Detection:**
Collaborated in a 5-member team to develop a CNN-based plant disease detector using TensorFlow, supervised ML, and multiple linear regression; focused on translating model outputs into actionable insights.
- **Multi-Modal Text Narration:**
Co-developed an accessibility-focused mobile app integrating OCR and TTS for visually impaired users; managed integration and stakeholder communication throughout the project lifecycle.
- Also for my coding skills I would like to attach my LeetCode profile, [Leetcode Profile](#) . I am currently working on problems each day to improve my consistency and continue to practice problem solving.
